Forty-third International Conference on Machine Learning

ICML 2026

🌐 Seoul, South Korea 📅 Jul 07 2026 🔗 <http://icml.cc> (<http://icml.cc>)
✉ program-chairs@icml.cc (<mailto:program-chairs@icml.cc>)

Please see the venue website for more information.

Submission Start: Jan 08 2026 12:00AM UTC-0, Abstract Registration: Jan 24 2026 11:59AM UTC-0,

Submission Deadline: Jan 29 2026 11:59AM UTC-0

Add: **ICML 2026 Conference Submission**

* denotes a required field

Title *

Title of paper. LaTeX commands should only be used within math mode $\$...\$$, without any user-defined macros. For text outside math mode, you may use markup for emphasis (**italic** and ****bold****); do not use LaTeX-style space commands (e.g., ~). Special characters should be inserted directly (e.g., é instead of '{e}). **The title should match what is eventually in the uploaded PDF.**

Authors *

Search author profile by first, middle and last name or email address. All authors must have an OpenReview profile prior to submitting a paper.

Yushu Wang (/profile?id=~Yushu_Wang2) ✕ ➔ *Jiakai Chen* (/profile?id=~Jiakai_Chen2) ✕ ➔

Dengke Zhang (/profile?id=~Dengke_Zhang2) ✕ ➔

Yanbin Ding (/profile?id=~Yanbin_Ding1) ✕ ➔ *Hao He* (/profile?id=~Hao_HE4) ✕

search profiles by email or name

Search

Verify Author List *

Search author profile by first, middle and last name or email address. All authors must have an OpenReview profile prior to submitting a paper. Note that the author list as submitted in the final version of the paper is final, and **no additions or removals from the listed authors are allowed after the abstract submission deadline**. Authors are encouraged to set their OpenReview name to exactly match their name as it will appear in the camera-ready PDF if accepted (including special characters, middle names, etc.).

☐ I have double-checked the author list and understand that additions and removals will not be allowed after the abstract submission deadline.

TL;DR

"Too Long; Didn't Read": a short sentence describing your paper

Abstract *

Abstract of paper. LaTeX commands should only be used within math mode $\dots$, without any user-defined macros. For text outside math mode, you may use markup for emphasis (**italic** and ****bold****); do not use LaTeX-style space commands (e.g., `~`). Special characters should be inserted directly (e.g., `é` instead of `{e}`). **The abstract should match what is eventually in the uploaded PDF.**

Primary Area *

Please indicate the primary subject area that best describes the paper.

Select Primary Area

Keywords*

Comma separated list of keywords.

Financial Conflict Of Interest Status

Select this box if any of the authors have financial or other substantive conflicts of interest that could reasonably be perceived to influence the submission, such as industry funding for work that evaluates or promotes the funder's product, system, or technology. As explained in the Peer-review Ethics (<https://icml.cc/Conferences/2026/PeerReviewEthics>), this information will be visible to the program chairs and the integrity chair, and will be only shared with the area chair and reviewers as appropriate (while preserving author anonymity).

☐ One or more authors have financial or other substantive conflicts of interest.

Ethics Agreement*

See the policies in the following documents:

- Call for Papers (<https://icml.cc/Conferences/2026/CallForPapers>), Author Instructions (<https://icml.cc/Conferences/2026/AuthorInstructions>), Research Ethics (<https://icml.cc/Conferences/2026/ResearchEthics>), Peer-review Ethics (<https://icml.cc/Conferences/2026/PeerReviewEthics>).

Violation of these policies may be grounds for desk rejection of a single submission or of all submissions by the same author.

Grounds for desk rejection of **all submissions by the same author** include (but are not limited to):

- Prompt injection (regardless whether all authors knew about it).
- Violation of concurrent submission policy. (The policy states that all papers submitted to ICML 2026 by the same author must view each other as prior work. If they are on related research topics that would be normally included in related work sections of the respective papers, they must cite and discuss each other in the body of the paper;

anonymized PDFs of the cited submissions must be provided in the supplementary material.)

- Neglect of reviewer or meta-reviewer duties (this is not limited to reciprocal reviewers).
- Interference with integrity of peer-review process, including collusion, declaration of unsubstantiated conflicts, and attempts to uncover the identities of reviewers or meta-reviewers.

☒ I certify that all co-authors of this work have read and are committed to adhering to the Call for Papers, Author Instructions, Research Ethics, and Peer-review Ethics.

Reciprocal Reviewing Status *

As explained in the Call For Papers for ICML 2026

(<https://icml.cc/Conferences/2026/CallForPapers>), at least one author of each submission must be registered as a reviewer. The registered reviewer should be qualified to review according to the definition given in the Peer Review FAQ (<https://icml.cc/Conferences/2026/PeerReviewFAQ>) (<https://icml.cc/Conferences/2026/PeerReviewFAQ>). If none of the authors are qualified under this definition, or if all of the qualified authors are serving as SACs, ACs, or in other organizing roles for ICML 2026, or are already listed as reciprocal reviewers on two submissions to ICML 2026, then the submission is exempt from this requirement. **Select one of the following.**

- ☐ This submission is NOT exempt from the Reciprocal Reviewing requirement. (We expect most submissions to fall in this category.)
- ☐ None of the authors are qualified according to the definition given in the Peer Review FAQ.
- ☐ All of the qualified authors are serving as SACs, ACs, or in other organizing roles for ICML 2026, or are already listed as reciprocal reviewers on two submissions to ICML 2026.
- ☐ I believe the submission is exempt for a different reason, specified below.

Reciprocal Reviewing Exemption Reason

If you believe this submission is exempt from the Reciprocal Reviewing requirement for a different reason (e.g., all authors are starting parental leave on January 31, 2026), please enter it here.

👁 Visible only to: ICML 2026 Conference ICML 2026 Conference Submission *number* Authors

Reciprocal Reviewing Author *

Please specify the profile ID (e.g., ~First_Last1) of the author who agrees to register as a reviewer to satisfy the Reciprocal Reviewing requirement. **Note that if this submission is exempt from Reciprocal Reviewing, then the selected author will not be required to review, so in this case, please just specify any author.** Only the information submitted at the abstract time will be considered.

LLM Policy *

ICML 2026 will follow a two-policy framework for the use of large language models (LLMs) in reviewing, based on the following two policies:

- **Policy A (Conservative):**
Use of LLMs for reviewing is **strictly prohibited**.

- **Policy B (Permissive):**

Allowed: Use of LLMs to help understand the paper and related works, and polish reviews. Submissions can be fed to privacy-compliant* LLMs.

Not allowed: Ask LLMs about strengths/weaknesses, ask to suggest key points for the review, suggest an outline for the review, or write the full review.

**By "privacy-compliant", we refer to LLM tools that do not use logged data for training and that place limits on data retention. This includes enterprise/institutional subscriptions to LLM APIs, consumer subscriptions with an explicit opt-out from training, and self-hosted LLMs. (We understand that this is an oversimplification.)*

Both authors and reviewers declare their preferences, and submissions are matched with compatible reviewers. **Any reviewer who is an author on a paper that requires Policy A must also be willing to follow Policy A.** Reviewing data will be analyzed to inform future policies. For full details, see <https://icml.cc/Conferences/2026/LLM-Policy> (<https://icml.cc/Conferences/2026/LLM-Policy>).

Please indicate whether you require Policy A for this submission, or you allow Policy B. Keep in mind that any author on a paper that requires Policy A must be willing to follow Policy A as a reviewer.

☐ This submission requires Policy A.

☐ This submission allows Policy B.

Proceedings-only Option

This year the authors of accepted papers will be able to decide whether they wish to present their paper in person at the conference or they just wish to include their paper in the proceedings. In the latter case, they do not need to attend the conference in person and are only required to purchase one virtual registration per accepted paper (see Call for Papers (<https://icml.cc/Conferences/2026/CallForPapers>)). To help with conference planning, we are asking authors about their tentative plans. **This question is optional and answering it does not bind authors either way.** The answer will not be visible to reviewers, area chairs, or senior area chairs, and it will not be part of the decision process. Its sole purpose is to help us plan the conference. The authors will be able to make their final decision by a specified date after the acceptance notification. **Select one of the following.**

☐ If this paper is accepted, the authors tentatively plan to present it in person at the conference (as a poster and, if selected, as an oral).

☐ If this paper is accepted, the authors tentatively plan to only include it in the proceedings (but not present it in person).

☐ The authors are undecided.

Ready For LLM Feedback

ICML 2026 provides an optional early LLM-powered feedback on your submission, which is only made available to the authors for improving the manuscript. The feedback is not revealed to the reviewing body, please see <https://blog.icml.cc/2026/01/14/icml-experimental-program-using-googles-paper-assistant-tool-pat/> (<https://blog.icml.cc/2026/01/14/icml-experimental-program-using-googles-paper-assistant-tool-pat/>) for more details. The eligibility criteria may be relaxed if capacity permits. **PDFs larger than 20MB will not receive LLM Feedback.**

Selecting this check box will trigger the LLM feedback request and use up the single available feedback voucher for the submitting user. The deadline for receiving guaranteed LLM Feedback is **Jan 22nd at 5 PM EST**. LLM Feedback is not guaranteed for submissions made after the deadline. High demand may create processing delays, so we encourage authors not to wait until the deadline to request feedback.

☐ The submitted PDF is ready for LLM feedback.
